Subject: Comments re: Draft Contents for Update 2003

Paul-

This is in follow up to last week's discussion about the Draft Contents for Update 2003.

In items 3 and 4 of Kamyar's outline, the outline lists "Impacts of Global Climate Change on Water Resources and Infrastructure" (in item 3) and "Climate Change Response Strategies" (in item 4).

Also in item 3, the outline lists "Water Infrastructure Vulnerability to Catastrophic Events" but no parallel section about response strategies in item 4.

I would like to see a parallel section in item 4 that is either "Water Infrastructure Vulnerability Response Strategies" or "Opportunities to Reduce Water Infrastructure Vulnerability."

I am thinking in particular about seismic vulnerability in the Delta where NHI and DWR have done A LOT of work together on crafting response strategies. I would like to see this included in the report. Let me know if I can provide additional information or if what you're getting from Curt Schmutte and Dave Mraz is sufficient.

Thanks,

Rich
